OUR PROCEDURE

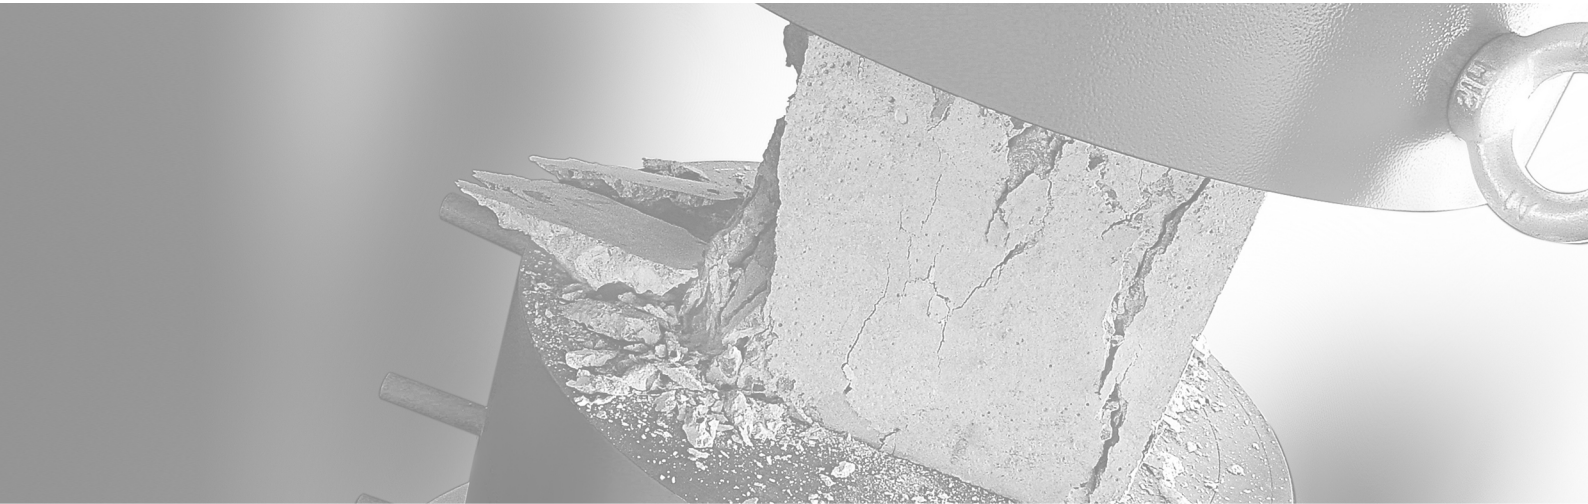

" OUR CONCRETE ARE PREPARED IN ACCORDANCE WITH THE FOLLOWING STRICT INTERNATIONAL STANDARD CODES "

- ACI -

OUR QUALITY POLICY AND LABORATORY FACILITIES

QUALITY POLICY

It is our team endeavor to produce better quality ready mix concrete as per our customers requirement at reasonable prices coupled with on time delivery. We follow a policy of international compliance for quality check procedure for both incoming materials and finished products. Our strength practices enable us to produce concrete of various strength grades. Necessary equipment for testing of raw materials such as stone chips, sand and cement have been set up in a laboratory at the factory. Trial mixes are carried out on regular interval to ensure proper mix proportion and continuous performance evaluation, in hot and cold weather.

LABORATORY FACILITIES

iMix Concrete has established a modern and well equipped laboratory to provide the highest quality of concrete. Mix designs of concrete are prepared by our experienced engineers and lab technicians according to international standard Code (ACI) and continuous testing of raw materials are done for quality checking. Various tests are done regularly to determine the properties of materials like coarse aggregate gradation, FM, Aggregate Crushing Value (ACV), Compressive Strength, etc. During the manufacturing process, Each delivery of mixer truck is checked for slump in order to maintain the desired quality and workability. Cube/Cylinder samples are crushed by our own compression testing machine as part of the continuous research work.
